

Trends in Abortion in the United States, 1973–2000

The Alan Guttmacher Institute (AGI)

© January 2003

The annual number of legal abortions increased through the 1970s, leveled off in the 1980s and fell in the 1990s.

Number of abortions (in 000s)

* By the end of 1970, four states had repealed their antiabortion laws, and 11 states had reformed them. The pre-1973 numbers listed are LEGAL abortions.

Sources: **1969–1972:** Center for Disease Control (CDC) *Abortion Surveillance, Annual Summary, 1973*, Atlanta: CDC, 1973. **1973–2000:** Finer LB and Henshaw SK, Abortion incidence and services in the United States in 2000, *Perspectives on Sexual and Reproductive Health*, 2003, 35(1):6–15.

Deaths from abortion declined dramatically after legalization.

*By the end of 1970, four states had repealed their antiabortion laws, and 11 states had reformed them. The pre-1973 numbers listed are LEGAL abortions.

1965–1967: National Center for Health Statistics (NCHS), *Vital Statistics of the United States, 1965: Vol. II—Mortality, Part A*, Washington DC: U.S. Government Printing Office (GPO), 1967; NCHS, *Vital Statistics of the United States, 1966: Vol. II—Mortality, Part A*, Washington, DC: GPO, 1968; and NCHS, *Vital Statistics of the United States, 1967: Vol. II – Mortality, Part A*, GPO, Washington, D.C.:1969. To distribute deaths categorized as “spontaneous or unspecified,” it was assumed that the ratio of spontaneous abortion deaths to pregnancy and childbearing deaths (excluding abortion and ectopic pregnancy) during 1965–1967 was the same as during 1968–1972, and that the remaining “unspecified deaths” were induced abortion deaths. **1968–1971:** Tietze C et al., The effect of legalization of abortion on population growth and public health, in: The Alan Guttmacher Institute, AGI, *Abortion 1974–1975: Need and Services in the United States, Each State and Metropolitan Area*, New York: AGI, 1976, pp. 110–113. **1972–1985:** Elam-Evans L et al., Abortion surveillance, United States, 1999, *Morbidity and Mortality Weekly Report*, 2002, 51, (SS–09), Table 19.

The abortion rate rose following nationwide legalization, but began to decline in the 1980s.

Abortions per 1,000 women aged 15–44

The Alan Guttmacher Institute

Note: Prior to the nationwide legalization of abortion, information on the number and rate of abortions was not gathered, and estimates of illegal and self-induced abortions varied widely. In the years immediately following the Roe v Wade decision, the number of LEGAL abortions grew rapidly for several reasons. The number of physicians trained and experienced in the procedure increased, and a nationwide network of outpatient abortion clinics developed that enabled women who would previously have had an illegal abortion, or would not have been able to obtain one at all, to do so legally in a medical facility.

Sources: **1969–1972:** Center for Disease Control (CDC) *Abortion Surveillance, Annual Summary, 1973*, Atlanta: CDC, 1973. **1973–2000:** Finer LB and Henshaw SK, Abortion incidence and services in the United States in 2000, *Perspectives on Sexual and Reproductive Health*, 2003, 35(1):6–15.

The abortion rate among teenagers has been declining since the late 1980s.

Abortions per 1,000 women aged 15–19

White women account for the majority of abortions, but the proportion of abortions that are provided to white women has declined steadily.

The Alan Guttmacher Institute

Note: In 1989, the survey wording changed, and the nonwhite category was further refined into black and other.

Sources: **1973–1988:** Henshaw SK and Van Vort J, eds., *Abortion Factbook 1992 Edition: Readings, Trends and State and Local Data to 1988*, New York: The Alan Guttmacher Institute, 1992, Table 3. **1989, 1993–1994, 1998–1999:** Unpublished tabulations of distributions published by the Centers for Disease Control and Prevention, adjusted for year-to-year changes in the reporting states. **1990, 1995, 1997:** U.S. Census Bureau, *Statistical Abstract of the United States: 2001*, 121st ed., Washington, DC: U.S. Census Bureau, 2001. **1991:** U.S. Census Bureau, *Statistical Abstract of the United States: 1996*, 116th ed., Washington, DC: U.S. Census Bureau, 1996. **1992:** U.S. Census Bureau, *Statistical Abstract of the United States: 1998*, 118th ed., Washington, DC: U.S. Census Bureau, 1998. **1996:** U.S. Census Bureau, *Statistical Abstract of the United States: 2000*, 120th ed., Washington, DC: U.S. Census Bureau, 2000.

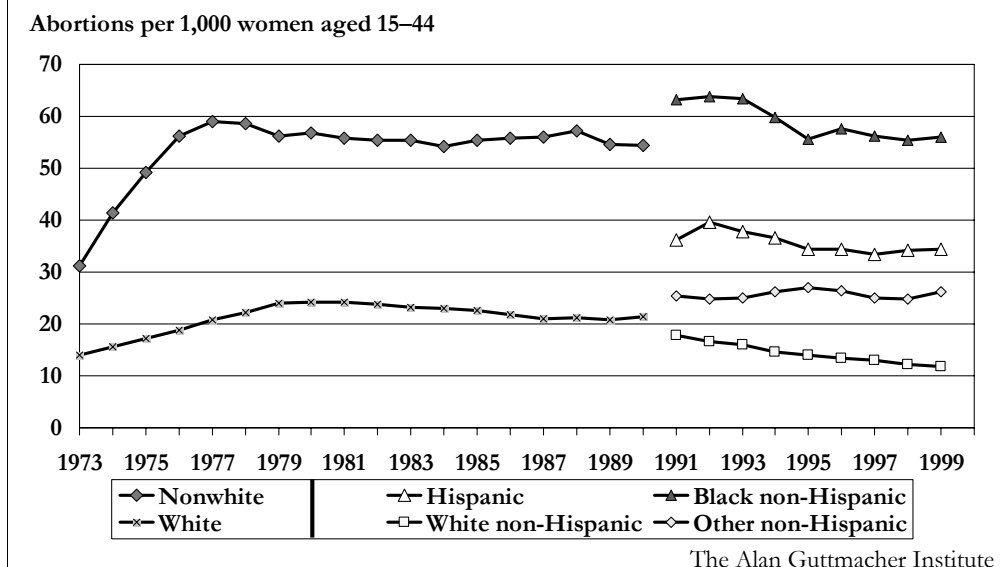

The proportion of abortions that are obtained by Hispanic women has increased over the past decade.

Note: In 1991, the survey wording changed, and women were asked to identify themselves as white non-Hispanic, black non-Hispanic, Asian or Pacific Islander, or Native American.

Sources: **1973–1988:** Henshaw SK and Van Vort J, eds., *Abortion Factbook 1992 Edition: Readings, Trends and State and Local Data to 1988*, New York: The Alan Guttmacher Institute, 1992, Table 3. **1989, 1993–1994, 1998–1999:** Unpublished tabulations of distributions published by the Centers for Disease Control and Prevention, adjusted for year-to-year changes in the reporting states. **1990, 1995, 1997:** U.S. Census Bureau, *Statistical Abstract of the United States: 2001*, 121st ed., Washington, DC: U.S. Census Bureau, 2001. **1991:** U.S. Census Bureau, *Statistical Abstract of the United States: 1996*, 116th ed., Washington, DC: U.S. Census Bureau, 1996. **1992:** U.S. Census Bureau, *Statistical Abstract of the United States: 1998*, 118th ed., Washington, DC: U.S. Census Bureau, 1998. **1996:** U.S. Census Bureau, *Statistical Abstract of the United States: 2000*, 120th ed., Washington, DC: U.S. Census Bureau, 2000.

Abortion rates are highest among black and Hispanic women.

Sources: **1973–1988:** Henshaw SK and Van Vort J, eds., *Abortion Factbook 1992 Edition: Readings, Trends and State and Local Data to 1988*, New York: The Alan Guttmacher Institute, 1992, Table 3. **1989, 1993–1994, 1998–1999:** Unpublished tabulations of population numbers obtained from the U.S. Census Bureau and distributions published by the Centers for Disease Control and Prevention, adjusted for year-to-year changes in the reporting states. **1990, 1995, 1997:** U.S. Census Bureau, *Statistical Abstract of the United States: 2001*, 121st ed., Washington, DC: U.S. Census Bureau, 2001. **1991:** U.S. Census Bureau, *Statistical Abstract of the United States: 1996*, 116th ed., Washington, DC: U.S. Census Bureau, 1996. **1992:** U.S. Census Bureau, *Statistical Abstract of the United States: 1998*, 118th ed., Washington, DC: U.S. Census Bureau, 1998. **1996:** U.S. Census Bureau, *Statistical Abstract of the United States: 2000*, 120th ed., Washington, DC: U.S. Census Bureau, 2000.

Poor and low-income women account for more than half of U.S. abortions.

After remaining stable for many years, the inflation-adjusted cost of an abortion has begun to rise.

Average amount paid for abortion at 10 weeks (\$)

The Alan Guttmacher Institute

Note: Also known as the cost-of-living index, the government's consumer price index measures changes in the price of typical consumer goods.

Source: Henshaw SK, The accessibility of abortion services in the United States, 2000, *Perspectives on Sexual and Reproductive Health*, 2003, 35(1):16–24, Table 2.

The number of states paying for medically necessary abortions for women on Medicaid has not changed greatly over the past 20 years.

Number of states (including DC)

* Arkansas funded only from January 1, 1998, to June 30, 1998.

Sources: Gold RB, Medicaid in FY78: states fund abortions, U.S. covers other 'family planning' services, *Family Planning/Population Reporter*, 1980, 9(2):28–34; Gold RB, States spent \$74.7 million for 'family planning' services under Medicaid program in FY79, *Family Planning/Population Reporter*, 1981, 10(2):32–38; Nestor B and Gold RB, Public funding of contraceptive, sterilization and abortion services, 1982, *Family Planning Perspectives*, 1984, 16(3):128–133; Gold RB and Macias J, Public funding of contraceptive, sterilization and abortion services, 1985, *Family Planning Perspectives*, 1986, 18(6):259–264; Gold RB and Guardado S, Public funding of family planning, sterilization and abortion services, 1987, *Family Planning Perspectives*, 1988, 20(5):228–233; Gold RB and Daley D, Public funding of contraceptive, sterilization and abortion services, fiscal year 1990, *Family Planning Perspectives*, 1991, 23(5):204–211; Daley D and Gold RB, Public funding for contraceptive, sterilization and abortion services, fiscal year 1992, *Family Planning Perspectives*, 1993, 25(6):244–251; Sollom T, Gold RB and Saul R, Public funding for contraceptive, sterilization and abortion services, 1994, *Family Planning Perspectives*, 1996, 28(4):166–173; The Alan Guttmacher Institute (AGI), The status of major abortion-related laws in the states, 2000. *State Funding of Abortion Under Medicaid*, State Policies in Brief, Washington DC: AGI, 2003 <http://www.guttmacher.org/pubs/spib_SFAM.pdf>, accessed Jan. 6, 2003.

Increasingly, states mandate parental involvement in a minor's decision to have an abortion.

Note: Some state courts have enjoined the enforcement of laws whose restrictions they say violate their states' constitutions.
